

# FIT Academy Exact Path School-wide Results 2017-18

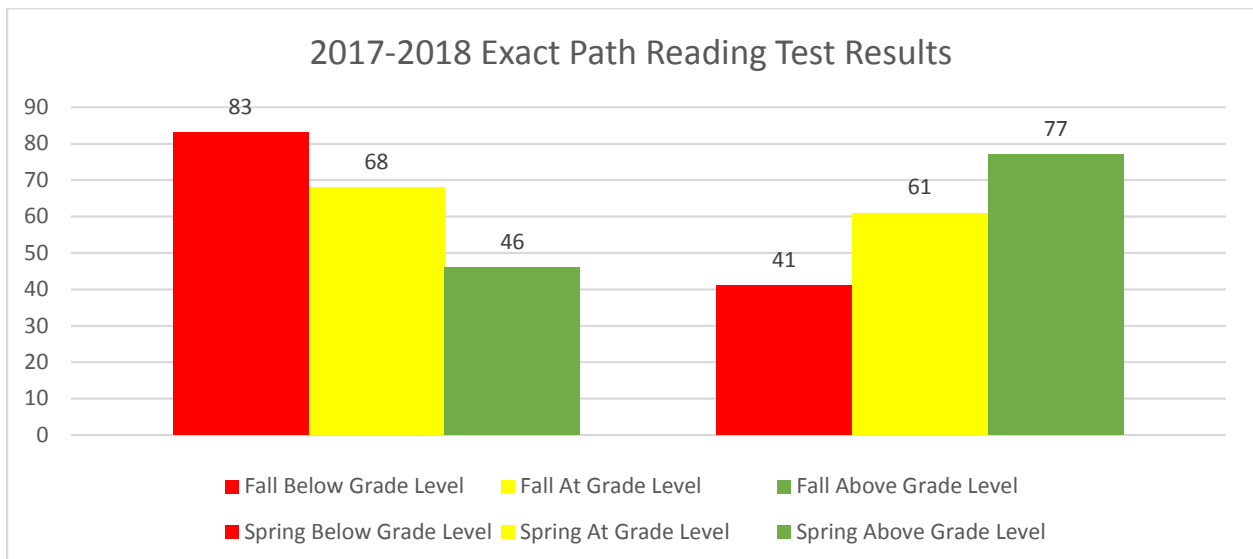

All FIT Academy students took the Exact Path diagnostic test in reading and math in the Fall and the Spring. Results for each student are compared to their nationally normed grade level. Below, you will find our Reading and Math results for the entire school as well as by grade. For each test administration, the table will show how many students scored below, at, or above grade level. The columns on the right show the growth in terms of decrease in students who are below as well as increase in students who are above. The bar graph represents our growth as a school with the Fall Pre-test represented on the left and the Spring post-test on the right.
