Distance Learning plan

As we begin the distance learning portion of the school year; I have some logistics to outline for you. I will also be posting this on each classroom's google classroom page.

Below is a list of items to read through that will outline how and when to complete assignments; how to submit assignments; how to communicate with me as well as designated grade specific times for communication.

There will be an introductory video for students to watch that will walk through this handout on google classroom; please have then view this as the first assignment beginning monday.

Weekly Agenda

Throughout the year I have posted each Monday , on google classroom, a template that has outlined the objectives for the week. As we move forward I will continue to utilize this to get the weekly agenda to you and your students.

Once you are connected please navigate to the document by:

1. Clicking on the Classwork tab (near the top of the page)
2. Weekly agenda should be the 1st subheading on that page. If not you can find 'Weekly Agenda' in the topic list on the left side of the page.
3. Please then click on the Agenda document that coincides with Monday's date for each week.

Assignments:

The links to the assignments can be found in the third column. They should always be blue.

You can either print them or answer each question on a separate paper and submit it that way.

If you choose not to print it; please write the assignment at the top of each page along with your name.

I am creating mini video lessons for each of the math assignments. Each video should be viewed prior to working on any assignment and can be found in the Classwork/videos column of the weekly agenda.

During each week the classes each have 2-3 assignments to be submitted through either text or email.

Submitting Assignments:

There will be two types of assignments:

Homework: scanned documents via the links in the weekly agenda

I can accept homework assignments via two methods.

For both please take a photo of the completed assignment and send it via one of the methods.
